

The Knowledge Bank at The Ohio State University
Ohio State Engineer

Title: Yearly Index of All Articles

Issue Date: May-1929

Publisher: Ohio State University, College of Engineering

Citation: Ohio State Engineer, vol. 12, no. 7 (May, 1929), 26-27.

URI: <http://hdl.handle.net/1811/34807>

Appears in Collections: [Ohio State Engineer: Volume 12, no. 7 \(May, 1929\)](#)

Left: Fig. 370, Jenkins Standard Bronze Gate Valve, screwed.

Like the earning of a letter

The earning of a varsity letter calls for better-than-average performance.

The Jenkins Diamond mark is much like a varsity letter. It is the sign of a valve built for better-than-average performance—a valve made to the highest standards in every stage of manufacturing processes. To earn the "Diamond" a valve must pass, at the Jenkins factory, a rigid test under pressures higher than those for which it is recommended.

There are Jenkins Valves for practically every plumbing, heating, power plant and fire protection requirement. Folder 100 gives a comprehensive survey of the various representative types; let us send you a copy.

JENKINS BROS.

YEARLY INDEX OF ALL ARTICLES

- Automatic Control—Edward A. Higgins—Feb. 1929.
Are Dead Wires Dangerous?—K. Y. Tang & Prof. Puchstein—Feb. 1929.
Beating Chicago's Traffic Bogey—M. L. Allen—March, 1929.
Concrete Theatre Balcony, A—I. T. Fenneman—April, 1929.
Characteristics of Screw Pumps—R. K. Annis—Nov., 1928.
College of Engineering, The—Pres. G. W. Rightmire—Jan., 1929.
From Our Dean—Dean E. A. Hitchcock—Oct., 1928.
Limited Cut-off Applied to Locomotives—Henry P. Seymour—Oct., 1928.
Modern Chain Making—George Dick—Jan., 1929.
New Frontier, The—C. V. Spangler—Nov., 1928.
Neon Sign Construction—R. W. Ewing—March, 1929.
Niagara Falls Project—Judd Lough—March, 1929.
Our New Concrete Street—Benn Blinn—April, 1929.
Primitive Engineering Project, A—E. W. Schoenborn, Jr.—Nov., 1928.
Prospecting in Peruvian Andes—Sixto E. Ludeña—Jan., 1929.
Radio Frequency Current—C. W. Rainey—Feb., 1929.
Rail Steel—Fred A. Kremser—April, 1929.
Relation Curve—D. A. Naftzger—Oct., 1928.
Station WEAO Gets New Studio—Fred A. Kremser—Jan., 1929.
Society's Debt to the Engineer—John B. Goddard—Jan., 1929.
Stopping Mother Nature—H. M. Scott—Jan., 1929.
Smoke Problem, The—Prof. F. W. Marquis—Nov., 1928.
Sheet Steel Operations—Edward W. Burd—April, 1929.
Shipping Out—Henry Taylor—March, 1929.
Steel Oil Derricks—C. V. Spangler—March, 1929.
Telephotography—C. A. Parker—Feb., 1929.
Under and Over the Metropolis—M. L. Allen—Feb., 1929.
Welded Steel Construction—E. M. Sevcik—April, 1929.
Why Not Nicaragua?—M. L. Allen—April, 1929.

The Ohio State University Radio Club has accomplished some fine work this year. Having moved from adverse quarters, located on Frambes Avenue, to a newly constructed club-house, located near the broadcasting, WEAO, the members immediately started construction of a 40-meter short wave communication equipment with which they have had fine results. The signals were listed as one of two of the best 1929 signals on the air in the eighth district consisting of several thousand stations. The University of Cincinnati held the other honor. The club now contemplates the construction of an elaborate radio telephone transmitter. The Communications Laboratory will assist in the work.

Two Opportunities Are Offered You by Sullivan Engineers

To you as an engineer, the Sullivan Machinery Company offers two opportunities.

You may have at your disposal, any time, the wealth of mining, construction, and manufacturing knowledge—gleaned by Sullivan Engineers during two generations.

Or, for a few men, the company has a place on its engineering sales staff.

When you leave college, you may decide to enter the construction field: to lay concrete highways across the nation, bridge and dam mighty streams, or tunnel through hard rock mountain ranges.

You may devote your abilities to wresting from nature—coal, iron, and the useful metals—or precious ones for civilization's adornment. Or you may put your hand to scientific manufacturing.

But whatever your choice; get acquainted with Sullivan Engineers. They are graduates of colleges like your own. They are always near you. And they will gladly help you solve a difficult engineering problem.

If you are interested in your opportunities as a member of the *Sullivan Engineering Sales Staff*, send for the booklet, "Engineering Sales Opportunities."

The coupon will bring you Sullivan Catalogs, and the "Opportunities" booklet.

Eleven Sullivan Air Compressors, Five Sullivan Drill Steel Sharpeners and Six Furnaces, and Sullivan Drill Carriages helped complete the Cascade Tunnel three days before schedule.

USE THIS COUPON

I expect to enter engineering work in the _____ industry. Please send me your literature.

☐ Send me also the booklet "SALES ENGINEERING OPPORTUNITIES."

SULLIVAN MACHINERY COMPANY, 815 WRIGLEY BLDG., CHICAGO

Bailey Meters

BAILEY BOILER METERS are of real assistance in obtaining maximum efficiency and capacity from boiler operation because they record the rate of Steam Flow from the boiler, the rate of Air Flow through the furnace and the Flue Gas Temperature on a single uniformly graded chart. The relation between the Steam Flow and Air Flow shows instantly whether an excess or a deficiency of air is being supplied. Stoker speed as well as the integrator for Steam Flow may be added.

BAILEY MULTI-POINTER GAGES are made with any number of pointers to fit each installation. Indicate Pressure, Temperature, Rate of Flow, Draft, Speed, etc.

BAILEY METERS FOR COAL AND GRANULAR MATERIALS measure coal, crushed ore and other granular materials in large quantities.

BAILEY FULID METERS record and integrate the flow of steam or water at any pressure or temperature. The meters may be supplied with pressure recorders, temperature recorders or both.

BAILEY GAS METERS record and integrate the flow of low or high pressure gas or air at any temperature. Special meters built for measurement of chemically active gases.

BAILEY GRAVITY RECORDERS FOR LIQUIDS record the true specific of a flowing sample on a 12-inch circular chart.

OTHER TYPES OF METERS as well as recording and indicating Gages are made for different purposes, so that nearly any problem in connection with the metering of fluids can be handled.
